ELEMENT LIFESTYLE RETIREMENT INC.

Management's Discussion and Analysis For the Three and Six Months Ended November 30, 2017

The Management's Discussion and Analysis ("MD&A") of Element Lifestyle Retirement Inc. ("Element" or the "Company"), has been prepared by management as of January 24, 2018 and provides information that management believes is relevant to assessing and understanding the financial condition of the Company and the results of its operation and cash flows for the three and six months ended November 30, 2017. This MD&A provides information on the operations of the Company and should be read in conjunction with the unaudited condensed consolidated interim financial statements for the three and six months ended November 30, 2017, and the audited consolidated financial statements and accompanying notes of the Company for the years ended May 31, 2017 and 2016.

The Company's unaudited condensed consolidated interim financial statements and audited consolidated financial statements and the notes thereto have been prepared in accordance with International Financial Reporting Standards ("IFRS"), as issued by the International Accounting Standards Board ("IASB") and are reported in Canadian dollars. References to notes are to notes of the unaudited condensed consolidated interim financial statements for the three and six months ended November 30, 2017, unless otherwise stated.

1. Corporate Background

The Company (formerly Sonoma Resources Inc., "Sonoma") was incorporated under the British Columbia Company Act on May 31, 2007. On December 2, 2015, the Company completed a Share Exchange Agreement with the security holders of Element Lifestyle Management Inc. (formerly known as Element Lifestyle Retirement Inc.), a private company which was incorporated under the Business Corporations Act (British Columbia) on June 12, 2013. Pursuant to which the Element Lifestyle Management Inc. (formerly known as Element Lifestyle Retirement Inc.) security holders transferred all of their common and preferred shares in exchange for common shares of Sonoma on a 1:1 basis.

These consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries, Element Lifestyle Management Inc. (formerly known as Element Lifestyle Retirement Inc.), Element Lifestyle (Vic Harbour West) Inc. and Element Lifestyle Retirement (Hong Kong) Limited (formerly known as Team Host Development Ltd.) ("Element (Hong Kong)"). Element (Hong Kong) was incorporated in Hong Kong under the Companies Ordinance (Chapter 622 of the laws of Hong Kong) on February 23, 2016 and is a wholly-owned subsidiary of the Company. Element (Hong Kong) was incorporated to explore opportunities in Hong Kong and China but is currently inactive.

The Company is a listed issuer on the TSX Venture Exchange ("TSXV") and its common shares trade under the symbol "ELM".

2. Core Business

Element is a retirement living specialist that exists to improve quality of life for seniors and their families. Collectively, Element's leadership team has well over 100 years' experience in real estate and master-planned community development, with specialization in hospitality management, and retirement community development and operations. The Company has comprehensive development expertise and is a vertically integrated organization that operates the communities that it develops under management contracts for terms of twenty years or longer.

The core business of Element has been the development and management of third party assets in the "retirement community" space. On August 29, 2017, the Company completed the purchase of a 1.96 acre property along the harbourside of Victoria at Bayview Place, British Columbia (the "Bayview Project") that it plans to develop. Further details are noted below in Outlook and Strategy. This acquisition represents a first step in the Company's positioning to expand its business into the ownership arena through selective acquisitions that comprise a combination of existing operating assets and property for new development.

New developments will be under Element's vibrant intergenerational aging-in-place model. It encompasses a seamless transition for older adults from independence to assisted living to complex care, while integrating both accommodation and activities for all ages. This enables older adults and their families to have peace of mind with the availability of adaptive personalized support services in a purpose-built community that will accommodate residents' changing needs. The Company is changing the perception and experience of aging with its innovative model.

3. Principal Services

Element's key objective is providing two primary types of services to its client companies: (a) development services and (b) management services. An important aspect of Element's business plan will involve the participation in ownership of real estate assets. As such, Element will be providing services to retirement communities partially or wholly-owned by Element, as well as retirement communities owned by third parties. Element's strategy is to grow with fiscal prudence but seeks to minimize risk and investment in capital expenditures. To achieve this, Element's primary focus in the short term will be to offer its development and management expertise to third party owners and independent operators and to place asset ownership as a secondary priority. As a management services organization, Element may have a significant ownership interest in the real estate assets it is developing or managing. Element does not have an ownership interest in the two projects, OPAL by element and OASIS by element, which it is currently managing, however, it has a 100% ownership interest in the Bayview Project.

(a) Development Services

The Company's development consulting services include property selection, assembly and acquisition; building and community design; municipal approval and land entitlement processes; financing; marketing, sales and leasing, and construction project management.

The development stage of a seniors' residence project is critical to the success, reputation and long-term sustainability of the business. When a residence has an optimal blend of suite mixture, layout and design, the business operates more effectively and efficiently. Purpose-built design can contribute greatly to overall resident and family satisfaction which in turn may contribute to reduced vacancy and increased profitability.

(b) Management Services

The Company can also provide expertise in day-to-day operations that ensure growth, profitability and retention. With its extensive expertise, Element is skilled in addressing every aspect of the daily operations of a seniors' living community, with services tailored to meet a resident needs. Once the development stage is completed, Element will be providing long-term management of the facilities. The Company manages the administration, operation and financing of retirement communities and physical facilities. Under its model, Element will provide care and supportive services, activities programming and extensive amenities for various lifestyles, from Independent Living, Assisted Living, Complex Care to End-of-Life Care. The model aims to enable holistic wellness (mind, body and spiritual) and quality of life for seniors.

In summary, the Company oversees the entire development process and commits for the long term to manage ongoing operations and administration once development is completed. This vertically integrated concept is unique and sets the Company apart from other retirement operators in the industry.

Continuum of Lifestyles (Adaptive, Customized Support and Care)

Underpinning all of these services is the concept of client needs and service. The Company customizes its services to the unique preferences and objectives of residents of local communities where they can choose from a comprehensive package or select individual services that best meet their needs. Management recognizes that the Company's success, reputation and continued business relationships depend on the success of this mandate.

Element will emphasize that the "Continuum of Lifestyles" model of retirement living brings a positive impact to the way older adults experience their hard-earned, work-optional later years of life. Element's retirement communities are not merely places where care services are administered in a hospital-like environment; rather, they

embody the intimacy and warmth of home, along with carefree living that inspires a sense of pride, dignity and passion for life through intergenerational activities, services and accommodations resembling those typically found in exclusive clubhouses and resorts.

A breakdown of the various Continuum of Lifestyles available is noted as follows:

Independent Living Lifestyle – designed to meet the needs of seniors who are able to live independently and want the freedom and privacy of their own separate suite, along with the security, comfort and social activities of a seniors’ residence.

Assisted Living Lifestyle – designed to meet the needs of seniors who seek housing with supportive care and services including assistance with daily activities.

Complex Care – serves seniors that require higher levels of care and who have lost their independence. Care plans are carefully created in collaboration with the residents’ care provider team to ensure the resident can enjoy activities of daily living in a safe and caring manner. It is staffed 24 hours a day/7 days per week by licensed nurses and care workers.

The Company takes the Continuum of Lifestyles model to the next level: the incorporation of intergenerational living so that not only seniors stay together, but all generations of family and community can be integrated in activities and programming, including child care and education involving seniors. This concept brings families together, creating the ability for seniors, their children, and grandchildren to all live and interact within the same community if they choose to. This model builds community and a quality of life that is unparalleled in the industry and enhances the lives of seniors and their families.

4. Business Highlights

The Company is currently engaged in the development of two seniors’ retirement communities, “OPAL by Element” (“Opal”) and “OASIS by Element” (“Oasis”). Both Opal and Oasis are owned by related parties (see “Related Party Transactions”). Revenue for the three and six months ended November 30, 2017, were \$678,297 and \$1,361,946 respectively compared to \$500,000 and \$500,000 for the same period in the previous corresponding periods. The increase in revenues reflects consulting fees for both the Opal and Oasis projects. In the past, the Company received fees when certain milestones were achieved. Amended consultant agreements to provide for compensation terms more favourable to the Company and better reflective of industry standards were signed, effective May 1, 2017, for both the Opal and Oasis projects and on a go-forward basis, fees will be billed and paid in monthly instalments when services are rendered.

Strategic Planning Update - Until recently, the Company’s revenue model was based on the development and management of third-party retirement community assets. Over the past few months, the Company has augmented this business model and entered the acquisition arena. This strategic step towards building a portfolio of partially or wholly-owned assets is expected to include: 1) acquiring and developing land under Element’s intergenerational aging-in-place model in amenity-rich locations, 2) the potential purchase of existing operations for immediate operating revenue, and ultimately, 3) the long-term management of the properties that the Company owns. To align and support this growth strategy, the leadership team has collaborated in a determined effort to increase revenues, reduce general and administrative expenses and ultimately, improve shareholder value.

Cost Management - The Company continues to be focused on taking significant measures to reduce its monthly cash burn by eliminating non-essential expenditures and preserving its cash position.

Opal Project

Element is the development and operations consultant to Opal Retirement Inc. and, as such, is managing the development of the Opal Project to its completion. The Opal Project consists of plans for a lifestyle retirement community to be constructed, which will be comprised of approximately 142,000 square feet with 44 seniors’ residential condominium units (these units will be available for sale to seniors), 56 seniors’ rental units and 30 seniors’ Complex Care units. An amendment to zoning was officially enacted on April 5, 2016 and the Development

Permit (DP) was issued on September 12, 2016. The Discovery Sales Centre at City Square was officially opened October 15, 2016. The demolition permit was issued on December 22, 2016 and the excavation permit was issued on February 2, 2017. Construction of the Opal Project is expected to be completed in the first quarter of the calendar 2019 year.

Oasis Project

The project is a master-planned community on 17 acres of land in the Township of Langley, conveniently located across from the Langley Events Centre. It is the first property in the Township's Official Community Plan that supports high-density development. The development is expected to be completed in phases and to consist of approximately 721,000 square feet of gross floor area for residential use with 835 residential units and 26,000 square feet of gross floor area for commercial use. The rezoning application was submitted to the Township of Langley on December 11, 2015. The project is proceeding as planned and is anticipated to receive Third Reading in the rezoning process from the Township of Langley within this fiscal year.

Bayview Project

On August 29, 2017, the Company completed the purchase of a 1.96-acre property along the harbourside of Victoria at Bayview Place that it plans to develop. The Bayview Project is a proposed \$74.5 million project that will comprise approximately 155 elegantly accommodated units and project completion is anticipated for the fourth quarter of calendar year 2020.

5. Future Business Opportunities

The management team continues to explore numerous business opportunities. The Company has made a significant investment in its people and strongly believes that this key asset is very important when building its corporate brand and engaging with prospective future business partners. The Company believes that it is critically important to have a strong operational team to not only properly investigate future business opportunities but also to ensure that development designs meet operational needs when projects are transitioned to long-term management contracts.

The Company is confident that it has sufficient cash and human resources to implement its robust management model and will raise additional monies, if required.

6. Financial Highlights

The following discussion of the Company's financial performance is based on the unaudited condensed consolidated interim statements of financial position as at November 30, 2017 and May 31, 2017, and the unaudited condensed consolidated interim statements of comprehensive income (loss) for three and six months ended November 30, 2017 and 2016.

The consolidated statements of financial position as of November 30, 2017 indicated a cash balance of \$3,812,306 (May 31, 2017 - \$4,244,764), Account receivables of \$ nil (May 31, 2017 - \$143), prepaid expenses of \$7,429 (May 31, 2017 - \$5,905) and total current assets of \$ 3,819,735 (May 31, 2017 - \$4,250,812). The decrease in total current assets was mainly due to a decrease in cash consumed in the normal course of business operations.

Non-current assets consisted of property and equipment \$382,240 (May 31, 2017 - \$421,194), property under development of \$7,179,631 (May 31, 2017 - \$56,819) and trade-marks of \$15,232 (May 31, 2017 - \$14,338). The increase in non-current assets was due to the acquisition and ongoing development of the Bayview project.

Current liabilities were \$4,047,326 (May 31, 2017 - \$1,961,887). The increase was primarily due to \$3,500,000 mortgage loan associated with the acquisition of the Bayview project in the first quarter.

Long-term debt is convertible debentures of \$1,514,081 (May 31, 2017 - \$Nil). The convertible debentures was arranged in connection with the acquisition of the Bayview project during the first quarter.

Shareholders' equity was comprised of common shares of \$8,766,702 (May 31, 2017 - \$7,262,300, including \$580,000 for subscriptions received in advance), share issuance costs of \$257,635 (May 31, 2017 - \$225,482), retained earnings (deficit) of \$(3,983,200) (May 31, 2017 - \$(4,389,739)). During the three and six months ended November 30, 2017, the Company received net proceeds of \$nil and \$2,529,222 (including \$580,000 for subscriptions received in advance) respectively for the issuance of 12,646,111 units of common shares and 6,323,055 units of warrants in a private placement. The fair value of share purchase warrants granted pursuant to the private placement was estimated to be \$444,820 using the Black-Scholes Option Pricing Model and the remaining of \$2,084,402 was allocated to share capital. Shareholders' equity also included stock-based compensation reserve of \$144,311 (May 31, 2017 - \$109,541), the equity component of convertible debentures of \$677,998 (May 31, 2017 - \$Nil) relating to the issuance of convertible debentures during the first quarter, and contributed surplus of \$42,435 (May 31, 2017 - \$24,656) relating to warrants expired in a prior period and 200,000 options expired on September 15, 2017.

Working capital was negative \$227,591 at November 30, 2017, as compared to \$2,288,925 at May 31, 2017. The decrease of \$2,516,516 was mainly due to the mortgage loan as described above.

For the three and six months ended November 30, 2017, the Company reported net income (loss) of \$(15,942) and \$406,539 respectively compared to a net loss of \$(122,267) and \$(661,518) respectively for the comparative periods in the previous year. Basic and diluted income (loss) per share based on a weighted average of 68,478,299 and 66,405,166 common shares were \$0.000 and \$0.006 respectively for the three and six months ended November 30, 2017, compared to a loss of \$(0.002) and \$(0.012) were based on a weighted average of 55,832,188 and 54,996,778 respectively common shares for the comparative periods in the previous year.

The Company's share capital, stock options, and share purchase warrants, as of November 30, 2017, were as follows:

Common shares, issued and outstanding	68,478,299
Stock options	1,360,000
Share purchase warrants	6,323,055

At November 30, 2017, the Company's stock options had a weighted average exercise price of \$0.25 and a weighted average contractual life of 3.97 years, and the Company's share purchase warrants had an exercise price of \$0.30 and an expiry date of June 30, 2019.

7. Subsequent Events

No subsequent events.

8. Outlook and Strategy

The Company's key strategic priorities are:

- completing construction in the first quarter of calendar year 2019 regarding the OPAL Project, in the core of Vancouver's vibrant Cambie Village;
- taking the Company's award-winning 17-acre master-planned project, OASIS in Langley, through to third reading anticipated in calendar year 2018;
- commencing development activities, without delay, on the proposed \$74.5 million project located on 1.96 acres along the harbourside of Victoria at Bayview Place that will comprise approximately 155 elegantly accommodated units. The Company completed the purchase of the property, that it owns outright, on August 29, 2017 and project completion is anticipated for the fourth quarter of calendar year 2020; and
- adding at least one significant property in British Columbia, that is owned by the Company, in the next eighteen months to the Company's portfolio to be developed and operated under its intergenerational aging-in-place model.

The Bayview acquisition represents a first step in the Company's positioning to expand its scope of business into the ownership arena through highly selective acquisition that comprises a combination of existing operating assets and property for new development.

The Company's directors and management believe that these priorities are formulating a solid foundation for Element Lifestyle Retirement Inc., and its shareholders, as it continues working towards building a prosperous, well-respected and long-term seniors' retirement development and management services organization.

In addition to improving its working capital position with the recent completion of two private placements, the Company continues to be focused on taking significant measures to reduce its monthly cash burn by eliminating non-essential expenditures and preserving its cash position.

The Company will continue to evaluate potential acquisitions to create a strong portfolio of projects, either owned or managed.

Management believes that the Company is well-positioned for both organic and external growth, supported by favourable demographics of a growing seniors' population, the strong demand for seniors' services and keeping in mind the operational and regulatory challenges to the seniors' living sector.

9. Selected Annual Information

Not applicable.

10. Summary of Quarterly Results

The following table presents selected financial information for each of the last eight quarters:

	Three Months Ended							
	Nov. 30, 2017	Aug. 31, 2017	May 31, 2017	Feb. 28, 2017	Nov. 30, 2016	Aug. 31, 2016	May 31, 2016	Feb. 29, 2016
Revenue	\$ 678,297	\$ 683,649	\$ 85,329	\$ -	\$ 500,000	\$ -	\$ -	\$ 1,000,000
Income (loss) from continuing operations	(18,018)	167,918	(438,728)	(647,335)	(122,267)	(540,094)	(545,479)	(591,285)
Net Income (loss)	(15,942)	422,480	(442,136)	(648,764)	(122,267)	(540,094)	(545,479)	(790,910)
Basic and diluted earnings (loss) per share	(0.00)	0.01	(0.01)	(0.01)	(0.00)	(0.01)	(0.01)	(0.02)

11. Financial Results for the Three Months Ended November 30, 2017

Revenues for the three months ended November 30, 2017 were \$678,297, compared to \$500,000 for the corresponding period of the previous year. The increase in revenues reflects consulting fees for both the Opal and Oasis projects. On a go-forward basis, fees will be billed and paid in monthly instalments when services are rendered which are expected to stabilize future revenues. The amended agreements have been approved by the TSX Venture Exchange.

Operating expenses were \$696,316 for the three month ended November 30, 2017, compared to \$622,267 for the same period last year. Noteworthy variances were in the following areas:

- **Compensation expense** – increased \$52,549 (2016 - \$nil). It represents the value of stock options granted to two officers on September 28, 2017.
- **Consulting fees**– decreased to \$23,125 (2016 - \$61,272). The decrease was primarily due to less consulting fees for ongoing investor relations services and other services the Company required as a public entity.
- **Interest expenses** – increased to \$83,675 (2016 - \$nil). It was mainly from the convertible debentures and mortgage loan.
- **Marketing and promotion** – increased to \$22,811 (2016 - \$10,900). The increase was primary due to increased marketing costs for the new Bayview project.
- **Professional fees** - decreased to \$35,280 (2016 - \$57,096) as the Company incurred less legal and advisory costs.
- **Salaries, wages and benefits** - increased to \$348,094 (2016 - \$327,881). Costs increased as the Company's one of the executive officers changed from a subcontractor to the salaried employee comparing to the same period of the prior year.
- **Travel** - decreased to \$28,702 (2016 - \$43,480) as the Company incurred less travel expenses to China.

Overall, operating expenses for the three months ended November 30, 2017 increased by \$74,049, or 11.9%. The change from the comparative period was primarily attributed to the items noted above.

Net loss from operations was \$18,018 for the three months ended November 30, 2017, compared to a net loss of \$122,267 for the corresponding period of the previous year. The net loss from operations reduced in the current period was mainly due to the increase in revenues noted above.

12. Financing Activities

No new financing activities during the second quarter ended November 30, 2017.

13. Liquidity

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. Working capital was negative \$227,591 as of November 30, 2017, compared to \$2,288,925 at May 31, 2017. The decrease was mainly due to \$3,500,000 mortgage loan associated with the acquisition of Bayview project. Management believes that there is sufficient working capital to maintain the Company's day-to-day operations when additional capital is needed.

Cash used in operating activities during the three months ended November 30, 2017, was \$632,229 (2016 - \$584,489). The increase was primarily due to an increase in deferred revenue, partially offset by net income for the period compared to a net loss for the comparative period of the previous year.

Cash used in investing activities during the three months ended November 30, 2017 was \$155,143 (2016 - \$148,322). The increase was primarily due to the Bayview property under development.

Cash provided by financing activities during the three months ended November 30, 2017 was \$nil (2016 – \$12,307). The decrease was primarily due to related party.

The following table details the remaining contractual maturities over the next five years of the Company's non-derivative financial liabilities, which are based on contractual undiscounted cash flows and the earliest date the Company will be required to pay:

<i>Contractual Obligations</i>	Payments Due by Period				
	Total	Less than 1 year	1-3 years	4-5 years	After 5 years
Account payables	\$ 72,076	\$ 72,076	\$ -	\$ -	\$ -
Mortgage loan	3,634,896	3,634,896	-	-	-
Convertible debentures	3,388,500	175,700	351,400	2,861,400	-
Total contractual obligations	\$ 7,095,472	\$ 382,672	\$ 3,851,400	\$ 2,861,400	\$ -

14. Commitments

On January 1, 2017, the Company entered into a five-year contract for leased premises with a company controlled by a certain director. Lease payments recognized as an expense during the three months ended November 30, 2017 totalled \$31,550 (2016: \$30,736). The future minimum lease payments are \$124,467 for years 2018 to 2021, and \$72,601 for 2022. Furthermore, upon commencement of the excavation work regarding the Bayview property, the Company will deposit \$1.8 million plus GST in trust with the Company's counsel, to be drawn and paid to Focus Equities Inc. on a monthly basis as work progresses. The excavation work will commence once the development permit is issued, which is expected in June 2018.

15. Capital Resources

The Company's objective is to maintain a strong capital base in order to maintain investor, creditor and market confidence and to sustain future development of the business.

Management defines capital as items included in shareholders' equity and debt, net of cash. The Board of Directors does not establish quantitative return on capital criteria for management; but rather promotes year over year sustainable profitable growth. The Company is not subject to externally imposed capital requirements.

16. Off-Balance Sheet Arrangements

At the date of this MD&A, to the best of management's knowledge, there were no off-balance sheet arrangements that have, or are reasonably likely to have, a current or future effect on the results of operations or financial condition of the Company.

17. Related Party Transactions

A number of key management personnel, or their related parties, hold positions in other entities that result in them having control or significant influence over the financial or operating policies of those entities. Certain of these entities transacted with the Company during the reporting period.

Relationship with Opal Retirement Inc. and Opal Development Limited Partnership

Opal Retirement Inc. ("Opal Retirement") is a wholly owned subsidiary of Care Pacific Holdings Ltd. ("Care Pacific") and the owner of the Opal Project. Opal Development Limited Partnership ("Opal Development LP") is a wholly owned subsidiary of Opal Retirement. The following principal Element shareholders are the shareholders of Care Pacific: Grand Vision Development Ltd., Kefei Investments Ltd. and Royal West Pacific Holdings Inc. Mr. Bo

Jun (Michael) Diao, the Chief Executive Officer and a director of Element, is the President and a director of Care Pacific, the sole director and officer of Opal Retirement and the sole director and shareholder of Royal West Pacific Holdings Inc. Messrs. Hua Min Chen, Hua Jie Chen and Hong Chao Chen are shareholders of Grand Vision Development Ltd. (“Grand Vision”). Mr. Bo Jun (Michael) Diao is the sole director of Grand Vision and is also the chairman and a director of Care Pacific. Mr. Ke Fei Deng is the sole shareholder and is a director along with Ms. Mei Deng of Kefei Investments Ltd. Mr. Ke Fei Deng is also a director of Care Pacific.

Relationship with Care Pacific (Maple Gardens) Inc. (“Maple Gardens”)

Maple Gardens is a wholly owned subsidiary of Care Pacific and the owner of the Oasis Project. The following principal Element shareholders are the shareholders of Care Pacific: Grand Vision Development Ltd., Kefei Investments Ltd. and Royal West Pacific Holdings Inc. Mr. Bo Jun (Michael) Diao, the Chief Executive Officer and a director of Element, is the President and a director of Care Pacific, the sole director and officer of Maple Gardens, and the sole director and shareholder of Royal West Pacific Holdings Inc. Regarding ownership and directorship of Grand Vision Development Ltd. and Kefei Investments Inc., please see above.

Transactions with Opal Retirement Inc. and Opal Development LP (Opal Project)

During the three months ended November 30, 2017, the Company recognized consulting fee revenue of \$272,046 (2016: \$Nil) from Opal Retirement (Opal Development LP). As at November 30, 2017, there was a balance of \$139,034 (May 31, 2017: \$722,904) in deferred revenue from Opal Retirement (Opal Development LP).

Transactions with Maple Gardens (Oasis Project)

During the three months ended November 30, 2017, the Company recognized consulting fee revenue of \$406,251 (2016: \$Nil) from Maple Gardens. As at November 30, 2017, there was a balance of \$270,834 (May 31, 2017: \$1,137,500) in deferred revenue from Maple Gardens.

Transactions with City Group Holdings Ltd.

City Group Holdings Ltd. (“City Group”) is a holding company owned by Mr. Don Ho, the President of Element. City Group is also an Element shareholder. On October 6, 2014, Element and City Group entered into a rental agreement for office space (1,322 sq. ft.) with a three-year term commencing on December 16, 2014 for monthly rent of \$5,930 plus GST. This lease was amended effective May 1, 2016 to increase the rent to \$10,321 plus GST to reflect the increase in office space Element is occupying (2,307 sq. ft.) The lease was amended again effective January 1, 2017 to extend the lease term to five years from 2017 to 2021. During the three months ended November 30, 2017, Element paid rent in the amount of \$31,550 (2016: \$30,736) to City Group.

Transactions with the Independent Directors

During the three months ended November 30, 2017, the Company incurred directors’ fees of \$10,000 (2016: \$14,333) regarding the Company’s independent directors.

Key Management Personnel Compensation and Transactions with Directors and Senior Officers

Key management includes the Company’s senior officers consisting of the President, the Chief Executive Officer, the Chief Financial Officer, the Chief Operating Officer, the Vice President, Operations, the Vice President, Development, and the Vice President, Marketing and Corporation Relations. The compensation paid or payable to key management personnel during the three months ended November 30, 2017 was \$284,529 (November 30, 2016: \$227,428).

18. Adoption of New Accounting Standards

Not applicable.

19. Accounting Standards issued but not yet Effective

The Company has reviewed new and revised accounting pronouncements that have been issued but are not yet effective. The Company is currently assessing the impact, if any, that these standards might have on its Financial Statements.

a) IFRS 9, Financial Instruments (IFRS 9)

In July 2014, the IASB issued IFRS 9. IFRS 9 replaces the current multiple classification and measurement models for financial assets and liabilities with a single model that has only two classification categories: amortized cost and fair value. The basis of classification depends on the entity's business model and the contractual cash flow characteristics of the financial asset or liability. It also introduces additional changes relating to financial liabilities and aligns hedge accounting more closely with risk management. IFRS 9 is effective for annual periods beginning on or after January 1, 2018, with early adoption of the new standard permitted. The Company does not intend to early adopt IFRS 9. The extent of the impact of adoption of IFRS 9 has not yet been determined.

b) IFRS 16, Leases (IFRS 16)

IFRS 16 will replace IAS 17 - Leases. This standard introduces a single lessee accounting model and requires a lessee to recognize assets and liabilities for all leases with a term of more than twelve months, unless the underlying asset is of low value. A lessee is required to recognize a right-of-use asset representing its right to use the underlying asset and a lease liability representing its obligation to make lease payments. The standard will be effective for annual periods beginning on or after January 1, 2019, but earlier application is permitted for entities that apply IFRS 15 (Revenue from Contracts with Customers) at or before the date of initial adoption of IFRS 16. The Company is assessing the impact of this new standard, if any, on the unaudited condensed consolidated interim financial statements.

c) IFRS 15, Revenue from Contracts with Customers (IFRS 15)

IFRS 15 is effective for years commencing on or after January 1, 2018, and replaces IAS 11, Construction Contracts, IAS 18, Revenue, IFRIC 13, Customer Loyalty Programmes, IFRIC 15, Agreements for the Construction of Real Estate, IFRIC 18, Transfer of Assets from Customers, and Standing Interpretations Committee ("SIC") 31, Revenue – Barter Transactions Involving Advertising Services. The standard contains a single model that applies to contracts with customers and two approaches to recognizing revenue: at a point in time or over time. The model features a contract-based five-step analysis of transactions to determine whether, how much and when revenue is recognized. New estimates and judgmental thresholds have been introduced, which may affect the amount and/or timing of revenue recognized. The extent of the impact of adoption of IFRS 15 has not yet been determined.

d) IFRS 2, Share-based Payment (IFRS 2)

On June 30, 2016, the IASB issued amendments to IFRS 2, clarifying how to account for certain types of share-based payment transactions. The amendments provide requirements on the accounting for the effects of vesting and non-vesting conditions on the measurement of cash-settled share based payments, share-based payment transactions with a net settlement feature for withholding tax obligations, and a modification to the terms and conditions of a share-based payment that changes the classification of the transaction from cash-settled to equity-settled. The amendments apply for annual periods beginning on or after January 1, 2018. The extent of the impact of adoption of the standard has not yet been determined.

20. Corporate Governance

The Company's Board of Directors and its committees adhere to recommended corporate governance guidelines for public companies listed on the TSXV to ensure transparency and accountability to shareholders. The current Board of Directors is comprised of five individuals, two of whom are independent of management as they are neither executive officers nor employees of the Company. The Audit Committee is currently comprised of three directors, two of whom are independent of management.

The Audit Committee's role is to ensure the integrity of the Company's reported financial results through its review of the interim and audited annual consolidated financial statements prior to their submission to the Board of Directors for approval. The Audit Committee meets with management quarterly to review the financial statements along with the MD&A, and to discuss financial, operating and other relevant matters.

21. Disclosure of Share Data as of January 24, 2018

The Company's share capital, stock options, and share purchase warrants, as of January 24, 2018, were as follows:

Common shares, issued and outstanding	68,478,300
Stock options	1,360,000
Share purchase warrants	6,323,055

At January 24, 2018, the Company's stock options had a weighted average exercise price of \$0.25 and a weighted average contractual life of 3.91 years, and the Company's share purchase warrants had an exercise price of \$0.30 and an expiry date of June 30, 2019.

22. Financial Instruments

Classification of Financial Instruments:

Fair Value of financial instruments

As at November 30, 2017, the Company's financial instruments consisted of cash, account receivables, account payables and accrued liabilities, mortgage loan, and convertible debentures. The fair values of account receivables and account payables and accrued liabilities approximate their carrying values because of their current nature. Mortgage loan and convertible debentures are carried at amortized cost.

Element classifies its fair value measurements in accordance with the three-level fair value hierarchy as follows:

Level 1 – Unadjusted quoted prices in active markets for identical assets or liabilities

Level 2 – Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly, and

Level 3 – Inputs that are not based on observable market data

The following table sets forth Element's financial assets measured at fair value by level within the fair value hierarchy as follows:

	Level 1	Level 2	Level 3	November 30, 2017	May 31, 2017
<u>Financial Assets:</u>					
Cash	\$ 3,812,306	\$ -	\$ -	\$ 3,812,306	\$ 4,244,764

Credit Risk

Financial instruments that potentially subject Element to concentrations of credit risks consist principally of cash, and trade and other receivables. The Company considers the risk of loss relating to cash to be low because these instruments are held only with highly-rated financial institutions. Element assesses the requirement for a provision based on historical experience.

Liquidity Risk

Liquidity risk is the risk that Element may encounter difficulties in meeting its obligations associated with financial liabilities and commitments. The Company's approach to managing liquidity is to ensure, as far as possible, that it will have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions without incurring unacceptable losses or risking harm to the Company's reputation.

The Company manages its liquidity risk through the preparation of annual expenditure budgets, which are regularly monitored and updated as management considers necessary, and through the Company's capital management activities.

As at November 30, 2017, the Company's financial liabilities were comprised of account payables of \$116,965 (May 31, 2017 - \$101,483) which have a maturity of less than one year, a mortgage loan of \$3,500,000 (May 31, 2017 - \$Nil), and convertible debentures of \$1,514,081 (May 31, 2017 - \$Nil).

The Company has successfully financed its operations through a mortgage loan, convertible debentures, and issuance of common shares (and/or share units) when additional capital is necessary.

Market Risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: currency risk, interest rate risk and other price risk. The Company is not exposed to significant price risk.

Currency Risk

Currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. For the three months ended November 30, 2017, the Company's revenues and expenses were recorded in Canadian dollars. The Company is not exposed to significant currency risk.

Interest Rate Risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company is not exposed to significant interest rate risk given that the mortgage loan and convertible debentures bear interest at fixed rates.

23. Risks and Uncertainties

The following risk factors apply to the Company's overall business whether Element is under a management contract, as operator only, or whether Element is managing a retirement community that it has an ownership interest in.

General Business Risks

The Company is subject to general business risks and to risks inherent in the seniors housing industry and the ownership of real property. These risks arise from a wide range of factors including: changes in varying levels of demand for retirement living and related services; fluctuation in occupancy levels; the inability to maintain or increase rents; increases in commodity costs, utility, energy and other operating costs; increases in construction costs; changes in the availability of and cost of labour; possible future changes in labour relations; competition from

or the oversupply of other similar properties; increases in home care support; changes in neighbourhood or location conditions and general economic conditions; the recurring need for renovation, refurbishment and improvement of properties; changes in regulations, trends, technology and service requirements in the seniors housing industry; health-related risks; disease outbreak and control risks; the imposition of increased taxes or new taxes; changes in cash flow, liquidity and interest rates; the availability of financing for development; changes in the availability and cost of money for long-term financing which may render refinancing of mortgages difficult or unattractive; operating or capital needs; the potential impact of a prolonged recession; a downturn or change in demographics; changes in critical accounting policies; and the ability of the Company to secure management contracts. In addition, the potential for reduced revenue growth exists in the event that the Company is unable to maintain its managed properties at a level that meets the expectation of its residents thus affecting the corresponding occupancy levels within these properties. Moreover, there is no assurance that expected demographic trends will continue or that the occupancy levels achieved to-date at the Company's properties and expected in the future will continue to be achieved. Any one of, or a combination of, these factors may adversely affect the cash available to, or the financial position, of Element.

Real Property Ownership and Lack of Diversity

As mentioned earlier, Element's business plan involves the acquisition of real estate. Real property investments are subject to a degree of risk which could have a material adverse effect on the business, results of operations and financial position of the Company. They are affected by various factors including changes in general economic conditions (such as the availability of mortgage funds) and in local conditions (such as an oversupply of space or a reduction in demand for real estate in the area); the attractiveness of the properties to residents; competition from other available space; and various other factors. In addition, fluctuations in interest rates may affect the Company. By specializing in one segment of the real estate industry (seniors' rental residences), the Company is exposed to adverse effects on that segment of the real estate market and does not benefit from the diversification of its portfolio by type of property. If properties do not generate revenues sufficient to meet operating expenses, debt service and capital expenditures, the Company's results from operations could be adversely affected. The performance of the economy in each of the areas in which the properties are located affects occupancy, market rental rates and expenses. These factors consequently can have an impact on revenues from the properties and their underlying values. The financial results and labour decisions of major local employers may also have an impact on the revenues from and value of certain properties. Certain significant expenditures involved in real property investments, including real estate/property taxes, maintenance costs, mortgage payments, insurance costs and related charges represent liabilities which must be met throughout the period of ownership of real property regardless of whether the property is producing any income. Some of the expenditures are variable, and beyond the control of the Company. If the Company is unable to meet mortgage payments on any property, losses could be sustained as a result of the mortgagee's exercise of its rights of foreclosure or sale or the lender's exercise of other remedies. Costs may also be incurred in making improvements or repairs to property required by a new resident and income may be lost as a result of any prolonged delay in attracting suitable residents to the vacant space as a result. There is a real possibility that the Company may experience inadequate or negative cash flow on a property as a result of escalating operating costs or declining revenue.

Liquidity of Real Estate Investments

Real property investments are relatively illiquid. This illiquidity will tend to limit the ability of the Company to vary its portfolio promptly in response to changed economic or investment conditions. There is a risk that the Company would not be able to sell its assets or that it may realize sale proceeds of less than the current book value of its communities.

Continued Growth

In addition to the general economic environment, the Company's growth prospects are essentially dependent on its ability to: successfully acquire new management contracts, successfully acquire ownership interests in newly targeted retirement residences; obtain approvals and construction financing for properties currently in pre-development and to successfully complete the construction and lease-up of the development; to find acquisition opportunities or new development opportunities in locations that meet Element's stringent criteria; and improve the financial performance of Element's existing communities. There is a risk that even should economic conditions

remain the same or improve, the Company may not be able to achieve growth. The ability to grow may require the issuance of additional common shares and the ability to do so may not always be a viable capital-raising option. Furthermore, timing differences may occur between the issuance of additional common shares and the time the proceeds may be used to invest in new properties. Depending on the duration of this timing difference, this may be dilutive. Element expects that it will have opportunities to acquire properties which will be accretive and enable it to increase cash flow through improved management and operations, but there can be no assurance that will be the case.

Acquisition and Development Risk

The Company will continue to seek and advance new developments, both corporately and jointly with third parties, with experienced industry participants and capital participants; however, new developments increase the risk that projected financial returns may not be achieved and that cost overruns or start-up losses may require further equity injections. In addition, any adverse impact from new developments will reduce the availability of capital from affected investors in co-tenancies for future developments. The Company evaluates each development separately including an extensive supply and demand analysis and establishing capital participants, to ensure certain criteria have been met. The Company attempts to reduce its development risk by entering into co-tenancy agreements with other investors, and the Company attempts to reduce future investments by relying upon its co-tenancy participants to provide the majority of capital required to develop new Element-branded residences. However, in such instances the ability of co-owners to fund their share of existing debt (including mezzanine debt and completion loans) and guarantees, and/or fund additional capital requirements adds to the Company's risk (see "RISKS AND UNCERTAINTIES – Reliance on Ability of Co-owners to Meet Their Obligations" below). The Company is also subject to growth restrictions if it is unable to attract equity investors to enter into new co-tenancy agreements when new opportunities are identified.

The success of Element's business acquisition activities, whether carried out solely or with co-owners, will be determined by numerous factors, including the ability of the Company to identify suitable acquisition targets, competition for acquisition opportunities, purchase price, ability to obtain adequate financing related to such acquisitions on reasonable terms, financial performance of the business after acquisition, and the ability of the Company to effectively integrate and operate the acquired businesses. Acquired businesses may not meet financial or operational expectations due to unexpected costs associated with the acquisition, as well as the general investment risks inherent in any real estate investment or business acquisition, including the existence of unexpected or undisclosed liabilities and the risk that Element's recourse against third parties may not be adequate to mitigate such liabilities entirely. Moreover, new acquisitions may require significant management attention or capital expenditures that would otherwise be allocated to existing businesses. Any failure by the Company to identify suitable candidates for acquisition or to operate the acquired businesses effectively may have an adverse effect on the business, results of operations or financial conditions of the Company.

Acquisitions, sales and development agreements entered into with third parties may be subject to unknown, unexpected or undisclosed liabilities which could have a material adverse impact on operations and financial results of Element. Representations and warranties given by such third parties to Element may not adequately protect against these liabilities and any recourse against third parties may be limited by the financial capacity of such third parties.

In addition, the letters of intent and purchase or sales agreements entered into with third parties with respect to such acquisitions or sales, as applicable, are generally subject to certain closing conditions, and in some cases, the granting of regulatory approvals. Such acquisitions or sales may not be completed due to the failure to satisfy closing conditions or the failure to receive required regulatory approvals and certain funds paid by Element may not be recoverable.

Reliance on Ability of Co-owners to Meet Their Obligations

In situations where the Company is developing assets with co-owners there exists a risk that co-owners may not be able to meet their ongoing obligations. The Company may provide advances, mezzanine financing, completion loans and guarantees on the indebtedness of certain co-owners in excess of the Company's proportionate interest in such projects. Until a new development is leased-up, the Company faces risks that are significantly higher than its pro-

rata ownership share. If the Company's guarantee is called upon, or the mezzanine and/or completion loan debt cannot be repaid through refinancing and there is insufficient equity in the property, and the co-owners are unable to fund their proportionate share of the indebtedness, the Company may be unable to recover the amount paid in excess of its proportionate interest. The Company may remedy such an event by acquiring such defaulting co-owners' interests at below cost, however the Company would have to fund such co-owners' share of the mezzanine debt, completion loan and/or guarantee. The Company may also be exposed to adverse developments, including a possible change in control, in the business and affairs of its co-owner partners, which could have a significant impact on the Company's interests in the project or affect the value of its interests, cause the Company to incur additional costs, impact the Company's ability to dispose of its interests in the project, or compel the Company to purchase the balance of the project.

Market Risk

Market risk is the risk of an adverse financial impact due to a change in market conditions, such as interest rates and equity prices that will affect the Company's income or the value of its holdings of financial instruments. The Company may buy derivative instruments in the ordinary course of business, and also may incur financial liabilities, in order to manage potential market risks. The Company is not exposed to significant price risk or currency risk, and significant currency risk is not exposed to significant interest rate risk given that the mortgage loan and convertible debentures bear interest at fixed rates.

Global Economic Financial Conditions

Adverse changes to the economic and financial conditions in Canada and globally could impact Element's ability to execute upon its operating, growth and financing strategies, which in turn could have a material adverse impact on Element's business, profitability and financial position. Global financial conditions may negatively impact access to public financing and may impact the Company's ability to obtain future financing on favourable terms. If such increased levels of volatility and market turmoil return, the Company's operations could be adversely impacted and the trading price of Element's common shares could be affected.

Liquidity Risk

Liquidity risk arises from the possibility of not having sufficient debt and equity capital available to the Company to fund its growth program and re-finance or meet its payment obligations as they arise. The Company's principal liquidity needs arise from or may arise from working capital requirements, debt servicing and repayment obligations, planned funding of maintenance, and possible property acquisition funding requirements.

Tax Risks

The Company is subject to various taxes including, but not limited to, Canadian income tax, goods and services tax (GST), land transfer tax and payroll tax, and its tax filings will be subject to audit by various taxation authorities. While the Company intends to base its tax filings and compliance on the advice of its tax advisors, there can be no assurance that its tax filing positions will never be challenged by a relevant taxation authority resulting in a greater than anticipated tax liability.

Geographic Concentration

A substantial portion of the business and operations of Element is conducted in British Columbia. The market value of these properties and the income generated from them could be negatively affected by changes in local and regional economic conditions.

Competition

The seniors' housing industry is highly competitive. Numerous other companies, developers, managers and owners of seniors' housing residences compete with Element in seeking residents. Competition for residents is based primarily on convenience of location, quality of the residence, reputation of the operator/brand, rental rates and the range and quality of food, and the services and amenities offered. Competition for residents and prospective

residents for Element's communities could adversely affect occupancies and Element's ability to attract residents and the rents which may be charged could affect Element's revenues, its ability to meet its debt obligations.

Competition for acquisitions of real properties can be intense and some competitors may have the ability or inclination to acquire properties at a higher price or on terms less favourable than those that the Company may be prepared to accept. An increased availability of investment funds in real estate, an increase in interest in real property investment or a decrease in interest rates may increase competition for real property investments and may increase purchase prices, reducing the yields on such investments or make it more difficult for the Company and its partners to locate and purchase suitable properties.

In addition to industry competition, the providing of in-home care services to seniors is enabling more and more seniors to remain in their homes for longer periods of time, thereby potentially eliminating or reducing their potential lengths of residency within retirement communities.

Element competes with various health care service providers and the hospitality operators in attracting and retaining skilled and qualified personnel to manage and operate the Company's communities. A shortage of trained and qualified personnel may require the Company to enhance wage and benefits packages in order to compete. No assurance can be given that labour costs will not increase, or that if they do increase, they can be matched by corresponding increases in rental and management revenue.

Reliance on Attracting Seniors with Sufficient Resources to Pay

The Company currently, and for the foreseeable future, expects to rely primarily on its residents' ability to pay rents and purchase services from their own or familial financial resources. Generally, only seniors with income or assets meeting or exceeding the comparable median in the region where the Company's properties are located can afford the Company's services. Inflation or other circumstances that adversely affect the ability of seniors to pay for the Company's services could have an adverse effect on the Company. Volatility in the residential real estate market generally, and in the economy as a whole, may affect the ability of potential residents to realize proceeds from the sale of a principal residence, or to generate income, which would otherwise allow them to be able to afford to live in a retirement community. If the Company encounters difficulty in attracting seniors with adequate resources to pay for its services, its business, operating results and financial condition could be adversely affected. It is important to note that revenues in the seniors' housing industry are not immune from economic factors (notably interest rates on retirees' savings, the ability of seniors to sell their existing residences and the value they will realize from such sales, and concerns about the funding of pension plans).

Reliance on Rentals and Rental Increases

Upon the move-out of any resident, there can be no assurance that the resident will be replaced or that a new resident will pay the same or greater rent. The failure to achieve rentals and maintain or increase rents may have an adverse effect on the financial condition of the Company.

Reliance on Attracting Co-owners

The Company may rely upon co-owner participants to provide the majority of the equity capital required to develop new Element Residences. These co-tenancy participants enter into long-term management contracts with the Company for the management of the property that will be developed or operated. There is no guarantee that the Company will be able to attract co-tenancy participants to provide the majority of the equity capital required for new developments. As well, there is no guarantee that the Company will be able to continue to obtain additional long-term management contracts.

Operational Risks

The Company is exposed to all of the operational risks inherent in managing and owning independent living and assisted living rental retirement properties for seniors. There is no assurance that the Company's policies and procedures to address these operational risks will be adequate or effective. The Company maintains insurance to cover some of these risks. See "RISKS AND UNCERTAINTIES – Liability and Insurance" below.

Damage from Fire or Other Calamities

The Company's ability to sustain or grow its business is heavily dependent on efficient and uninterrupted operations at its communities. Power failures or disruptions, the breakdown, failure or substandard performance of equipment, the improper installation of equipment and the destruction of buildings, equipment and other facilities due to natural disasters such as hurricanes, fire or earthquakes would severely affect its ability to continue operations. While it does maintain certain insurance policies covering losses due to fire, lightning and explosions, there can be no assurance its coverage would be adequate to compensate Element for the actual cost of replacing such buildings, equipment and infrastructure nor can there be an assurance that such events would not have a material adverse effect on its business, financial condition, results of operations or prospects. Even if losses were covered by insurance, damage to the Element brand could be substantial.

Liability and Insurance

The Company's business entails an inherent risk of liability, including with respect to injury or death of its residents. Management expects that from time to time the Company may be subject to lawsuits as a result of the nature of its business. The Company maintains general and professional liability, business interruption and property insurance policies in amounts and with such coverage and deductibles as deemed appropriate, based on the nature and risks of the business, historical experience and industry standards. However, certain types of losses are either uninsurable or not economically insurable. There can be no assurance that claims in excess of the Company's insurance coverage or claims not covered by its insurance will not arise or that the liability coverage will continue to be available on acceptable terms. A successful claim against the Company not covered by, or in excess of, its insurance could have a material adverse effect on the Company's business, operating results and financial condition. Claims against the Company, regardless of their merit or eventual outcome, also may have a material adverse effect on the Company's ability to attract residents or expand its business, and will require management to devote attention and resources to addressing such claims. There exists a risk that the insurance companies from which insurance is purchased may become insolvent and unable to fulfill their obligations to defend, pay or reimburse the Company when that obligation becomes due. The Company's policies are renewable periodically and the Company must negotiate acceptable terms for coverage upon renewal, exposing the Company to the volatility of the insurance markets, including the possibility of rate increases, and the Company cannot be sure to obtain insurance in the future at acceptable levels.

Litigation and Other Disputes May Adversely Affect the Company's Assets and Share Price

In the normal course of the Company's operations, whether directly or indirectly, it may become involved in, named as a party to or the subject of, various legal proceedings, including regulatory proceedings, tax proceedings, termination of employment and legal actions relating to personal injuries, property damage, property taxes, land rights, the environment and contract disputes. The outcome with respect to outstanding, pending or future proceedings cannot be predicted with certainty and may be determined in a manner that is materially adverse to the Company and as a result, could materially adversely affect the business, results of operations and financial condition of the Company. Even if the Company prevails in any such legal proceeding, the proceedings could be costly and time-consuming and may divert the attention of management and key personnel from the Company's business operations, which could materially adversely affect the business, results of operations and financial condition of the Company and its ability to pay dividends on its common shares.

Dependence on Executives and Other Personnel

The Company's success depends heavily on its ability to attract, retain and motivate key management and operating personnel. As Element expands its portfolio of retirement residences, it will require more skilled, qualified personnel. Recruiting personnel for the retirement industry is highly competitive. Element's failure to attract or retain qualified personnel could have a material adverse effect on its business. See "RISKS AND UNCERTAINTIES – Competition" above.

Additionally, Element is dependent on the services of key executives, and a small number of other highly skilled and experienced executives and personnel. The loss of technical knowledge, management expertise, and knowledge of operations of one or more members of the Company's executive management could result in a diversion of

management resources, as the remaining members of management would need to cover the duties of any executive officer who leaves the Company and would need to spend time usually reserved for managing the business to spend time to search for, hire and train new members of the management team. The loss of some or all of the Company's executives could negatively affect the Company's ability to develop and execute its business strategy, which could adversely affect the Company's business and financial results. Additionally, Element's inability to attract and retain additional highly skilled employees may adversely affect its business and future operations.

Changes in the Regulatory Environment

Laws periodically change and regulatory bodies may impose licensing requirements for certain facilities, health standards or services, change the terms of licences or impose more stringent environmental laws and regulations in the future. Inspections may identify deficiencies in the Company's operations. Changes in the law and regulations and inspections could have an adverse effect on the Company's operations and financial condition.

Personal Information

As a custodian of a large amount of personal information and personal health information relating to Element's employees and its residents, the Company is exposed to the legal and reputational risk of the loss, misuse or theft of any such information. Element mitigates this risk by deploying appropriate technology and training for its employees relating to the safeguarding of such information.

Risks Related to a Public Company and Common Shares

Volatile market price for common shares

The market price for common shares may be volatile and subject to wide fluctuations in response to numerous factors, many of which are beyond the Company's control, including the following:

- actual or anticipated fluctuations in the Company's quarterly results of operations;
- changes in estimates of future results of operations by Element or securities research analysts;
- changes in the economic performance or market valuations of other companies that investors deem comparable to the Company;
- addition or departure of the Company's executive officers and other key personnel;
- release or other transfer restrictions on outstanding common shares;
- sales or perceived sales of additional common shares;
- significant acquisitions or business combinations, strategic partnerships, joint ventures or capital commitments by or involving the Company or its competitors;
- news reports relating to trends, concerns or competitive developments, regulatory changes and other related issues in the Company's industry or target markets;
- conditions in the seniors housing industry and real estate industry generally;
- interest rates;
- the market for similar securities;
- general economic conditions in the financial markets;
- the Company's dividend practice; and
- the Company's financial condition, performance, creditworthiness and prospects.

Financial markets can have significant price and volume fluctuations that can affect the market prices of equity securities of companies and that may be unrelated to the operating performance, underlying asset values or prospects of the companies. Accordingly, the market price of the Company's common shares may decline even if the Company's operating results, underlying asset values or prospects have not changed.

Additionally, these factors, as well as other related factors, may cause decreases in asset values that are deemed to be other than temporary, which may result in impairment losses. As well, certain institutional investors may base their investment decisions on consideration of the Company's environmental, governance and social practices and performance against such institutions' respective investment guidelines and criteria, and failure to meet such criteria

may result in a limited or no investment in the common shares by those institutions, which could adversely affect the trading price of the common shares. There can be no assurance that continuing fluctuations in price and volume will not occur. If such increased levels of volatility continue, the Company's operations and the trading price of the common shares may be adversely affected.

Financial Markets

Uncertainty in the stock and credit markets may materially adversely affect the Company's ability to access additional financing for the continuation of the Company's operations and other purposes, including obtaining any renewals of existing financing on commercially reasonable terms, which may materially adversely affect the Company's business. Uncertainty over whether the economy will be materially adversely affected by inflation, deflation or stagflation and the systematic impact of increased unemployment, volatile energy costs, geopolitical issues and availability and cost of credit may contribute to increased market volatility and weakened business and consumer confidence. The future state of the financial markets may cause the Company to seek alternative sources of potentially less attractive financing, and may require the Company to adjust its business plan accordingly. This may also make it more difficult or costly for the Company to raise capital, including through the issuance of equity securities. The current conservative nature of the financial markets may have a material adverse effect on the market value of the common shares and the business, results of operations and financial condition of the Company.

Dilution and Future Sales of Common Shares

The Company's articles permit the issuance of an unlimited number of common shares and an unlimited number of preferred shares, and shareholders will have no pre-emptive rights in connection with such further issuances. The directors of the Company have the discretion to determine the price and the terms of issue of further issuances of common shares and preferred shares.

24. Disclosure Controls and Internal Controls Over Financial Reporting

The Company's business could be adversely impacted if there are deficiencies in disclosure controls and procedures or internal controls over financial reporting. The design and effectiveness of the Company's disclosure controls and procedures and internal controls over financial reporting may not prevent all errors, misstatements or misrepresentations. While management continues to review the effectiveness of the Company's disclosure controls and procedures and internal controls over financial reporting, it cannot assure that the Company's disclosure controls and procedures or internal control over financial reporting will be effective in accomplishing all control objectives all of the time. Deficiencies, particularly material weaknesses, in internal control over financial reporting which may occur in the future could result in misstatements of the Company's results of operations, restatements of the Company's financial statements, a decline in share price, or otherwise materially adversely affect the Company's business, reputation, results of operation, financial condition or liquidity.

Readers are cautioned that the Company is not required to certify the design and evaluation of its disclosure controls and procedures and internal controls over financial reporting and has not completed such an evaluation. The inherent limitations on the ability of the Company's certifying officers to design and implement on a cost-effective basis disclosure controls, procedures and internal controls over financial reporting for the Company may result in additional risks to the quality, reliability, transparency and timeliness of interim and annual filings and other reports provided under securities legislation.

25. Future Sales of Common Shares by Directors and Executive Officers

Subject to compliance with applicable securities laws, officers and directors and their affiliates may sell some or all of their common shares in the future. No prediction can be made as to the effect, if any, such future sales of common shares will have on the market price of the common shares prevailing from time to time. However, the future sale of a substantial number of common shares by the Company's officers and directors and their affiliates, or the perception that such sales could occur, could adversely affect prevailing market prices for the common shares.

26. Conflicts of Interest

The Company's directors and officers may serve as directors or officers, or may be associated with, other reporting companies, or have significant shareholdings in other public companies. To the extent that such other companies may participate in business or asset acquisitions, dispositions, or ventures in which the Company may participate, the directors and officers of the Company may have a conflict of interest in negotiating and concluding terms respecting the transaction. If a conflict of interest arises, the Company will follow the provisions of the Business Corporations Act (BC) ("Corporations Act") dealing with any conflict of interest. These provisions state that where a director has such a conflict, that director must, at a meeting of the Company's directors, disclose his or her interest and refrain from voting on the matter unless otherwise permitted by the Corporations Act. In accordance with the laws of the Province of British Columbia, the directors and officers of the Company are required to act honestly, in good faith and in the best interests of the Company.

27. Cautionary Note Regarding Forward-Looking Information

The Company's financial statements and this accompanying MD&A contain statements that constitute "forward-looking statements" involve a number of risks and uncertainties. As a consequence, actual results might differ materially from results forecasted or suggested in these forward-looking statements. Some of these risks and uncertainties are identified under the heading "RISKS AND UNCERTAINTIES" in this MD&A. Additional information regarding these factors and other important factors that could cause results to differ materially may be referred to as part of particular forward-looking statements. The forward-looking statements are qualified in their entirety by reference to the important factors discussed under the heading "RISKS AND UNCERTAINTIES" and to those that may be discussed as part of particular forward-looking statements. Forward-looking statements involve known and unknown risks, uncertainties, assumptions and other factors that may cause the actual results, performance or achievements of the Company to be materially different from any future results, performance or achievements expressed or implied by the forward-looking statements. Factors that could cause the actual results to differ include market prices, continued availability of capital and financing, inability to obtain required regulatory approvals and general market conditions. These statements are based on a number of assumptions, including assumptions regarding general market conditions, the timing and receipt of regulatory approvals, the ability of the Company and other relevant parties to satisfy regulatory requirements, the availability of financing for proposed transactions and programs on reasonable terms and the ability of third-party service providers to deliver services in a timely manner. Forward-looking statements contained herein are made as of the date of this MD&A and the Company disclaims any obligation to update any forward-looking statements, whether as a result of new information, future events or results or otherwise, except as may be required by law. If the Company does update one or more forward-looking statements, no inference should be drawn that it will make additional updates with respect to those or other forward-looking statements. There can be no assurance that forward-looking statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on forward-looking statements.

28. Approval

The Board of Directors of the Company have approved the disclosure contained in this MD&A.

29. Additional Information
